

EasyTime

Cloud & On-Premise Workforce Management

Attendance, Payroll & HR — All In One Place.

A modern, all-in-one workforce management platform built to replace the patchwork of biometric hardware software, spreadsheets, and separate HR/payroll tools most companies juggle today — at a fraction of the cost.

Full Arabic + English

Works with ZKTeco & Hikvision devices

Built-in AI Assistant

Cloud or Self-Hosted

One Platform Instead of Four

Most growing companies end up stitching together a biometric device vendor, a separate attendance system, a separate HR/payroll SaaS, and spreadsheets to fill the gaps. Every extra system means another login, another bill, and another place data can go out of sync.

✗ Biometric hardware vendor (ZKTeco / Hikvision devices) — hardware only, no real software

✗ Separate on-premise attendance software (e.g. BioTime / UTimeMaster) — dated, no mobile, no cloud

✗ Separate HR/payroll SaaS (e.g. JISR) — no device or attendance layer at all

✗ Spreadsheets to reconcile everything at month-end

✓ EasyTime replaces all four — one login, one bill, one source of truth.

Native Mobile Apps

Real iOS & Android apps with GPS-verified check-in — not a mobile website wrapper.

True Bilingual, Not Bolted On

Full Arabic + English with native right-to-left layout across every screen, report, and export.

Keep Your Existing Devices

Native support for ZKTeco and Hikvision biometric terminals you already own — no rip-and-replace.

Cloud or Self-Hosted

Run in our cloud, or install fully on your own servers — your data, your infrastructure, your choice.

EVERYTHING INCLUDED

One Subscription. Every Module.

No add-on modules to negotiate, no separate licenses per feature — every plan includes the full platform.

Attendance & Time Tracking

- Biometric, mobile, and web punch-in
- GPS-verified remote check-in
- Flexible, split, and multi-punch shifts
- Automatic break-time & overtime rules

Payroll

- Automated monthly salary calculation
- UAE WPS-compliant payroll export
- Loans, advances & expense claims
- Branded PDF payslips, emailed automatically

Advanced HR

- Certifications, documents & disciplinary records
- Onboarding workflows & asset tracking
- Training & performance reviews
- Gratuity (end-of-service) calculation

Access Control

- Named access groups & time-zone schedules
- Remote door unlock from the dashboard
- Real-time push to every connected device

Visitor Management

- Check-in / check-out with host tracking
- Pre-registration for expected visitors
- Live visitor dashboard

Device Management

- Native ZKTeco & Hikvision terminal support
- Auto-provisioning of new employees on enrollment
- Live command & sync history per device

Mobile App

- Native Android & iOS companion app
- Self-service leave, payslips & expenses
- GPS-verified punch from anywhere

Built-in AI Assistant

- Ask questions in plain English or Arabic
- Instant reports & routine task automation
- Role-scoped — sees only what each user can

Built to Beat the Legacy Systems

A general comparison against the systems most companies in this market already use. Exact features vary by a competitor's own plan tier — see the notes below.

CAPABILITY	EASYTIME	BIOTIME / UTIMEMASTER	HIKVISION SOFTWARE	JISR
Multi-tenant cloud SaaS	✓	✗ on-premise only	✗ on-premise only	✓
Self-hosted / on-premise option	✓	✓	✓	✗
Native mobile app (iOS & Android)	✓	● limited	● limited	✓
Full Arabic + English, native RTL	✓	● partial	✗	✓
Built-in payroll + UAE WPS export	✓	✗	✗	✓
Native biometric device layer	✓ ZKTeco + Hikvision	● ZKTeco only	● Hikvision only	✗ no device layer
Access control & visitor management	✓	● basic	✓	✗
Built-in AI assistant	✓	✗	✗	✗
Modern, actively updated UI	✓	● dated	● dated	✓
Migrate existing BioTime integrations	✓ compatible API	—	✗	✗
Pricing model	Transparent, per-employee	High upfront licensing	Bundled with hardware	Premium, HR-only

✓ full support · ● partial / limited support · ✗ not offered. Comparison reflects each vendor's commonly deployed configuration as of 2026; always confirm current specifics directly with each vendor for your exact use case.

Built for How Companies Actually Work Today

1

Already on BioTime? Switch without breaking anything.

EasyTime ships a drop-in, BioTime-compatible REST API — the exact integrations, scripts, and connectors your team already built (JISR links, custom payroll exports, reporting tools) keep working with zero code changes on their end.

2

Bring your own hardware.

No forced hardware refresh. EasyTime speaks the native protocol of both ZKTeco and Hikvision biometric terminals — the devices already installed at your sites keep working, fully synced, from day one.

3

Cloud convenience or complete data ownership — your call.

Run on our multi-tenant cloud with automatic updates and zero maintenance, or install the full platform on your own servers with the Local Install edition when data residency requirements demand it.

4

An AI assistant that's actually wired into your data.

Ask a plain-language question — "who was late this week?", "generate this month's WPS file" — and get a real, permission-scoped answer, not a generic chatbot bolted onto a marketing page.

5

Arabic that was designed in, not translated after the fact.

Every screen, report, PDF export, and mobile view supports native right-to-left Arabic alongside English — not a partial translation layer over an English-first product.

6

One transparent bill, not four separate ones.

No per-module licensing, no hardware bundling markup, no separate "HR-only" premium tier. One subscription includes attendance, payroll, HR, access control, visitors, mobile, and AI.

8

Modules in one platform

2

Native device protocols
(ZKTeco + Hikvision)

2

Deployment options
